

Welcome to ASTD's Advanced Designing Learning Certificate Program

Course Objectives

You will:

- Distinguish between near and far transfer tasks and identify training methods that lead to deep learning
 - Articulate the benefits of the need for learner-centered training
 - Design a case study that includes all major elements of best practice case studies using a project from your organization
 - Design a role play that includes all major elements of best practice role plays using a project from your organization
 - Identify training requirements that benefit from project work and create projects based on your own work environment
 - Design collaborative learning techniques including structured controversy that follow best practices and apply to a project from your organization
 - Apply rapid ISD techniques that could be used to develop training
 - Apply the best use of multiple performance support techniques that support far transfer work performance after training
 - Design stories and story features that best support diverse training goals and events
 - Design games and game features that best support diverse training goals and events.
